107. Financial Break even point is a point defining the level before the EBIT (earnings before interest and tax) at which the earnings per share of the company is equal to zero. Or, we can say, it is the level of EBIT that equals the fixed financial costs for the company, such as interest on the debt, preference dividend and more. Or, we can also call it the minimum EBIT that a company should earn to meet its fixed commitments.
